DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, 21-52, 57-72, 76-82, 86-99, 103-113, 117-128, drawn to a method distributing media and billing customers, classified in class 725 subclass 1.
- II. Claims 18-20, 54-56, 73-75, 83-85, 100-102, 114-116, 129-133 drawn to a laser storage medium and device with particular wavelength and track characteristic, classified in class 369, subclass 272.1.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the laser medium or the particular storage device of group II. The combination of group I can be store on magnetic storage medium for example. The subcombination has separate utility such a general data storage device or general

video/audio disc. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
